## NetMass Selects Asigra Product for Advanced Server Backup Technologies

Dallas, TX – (November 15, 2005) – NetMass, a leading provider of online backup and data protection solutions, announced today that it selected Asigra Televaulting as the software platform for its ServerSafe online data backup service. Asigra is a privately-held Toronto-based software specialist in agentless remote backup and recovery.

The award-winning Televaulting software from Asigra software is a robust, recognized solution for server backup and remote office backup. The company's innovations include the first agentless backup/recovery software solution and the first ILM-aware backup solution, while NetMass was one of the first companies to pioneer the online backup industry.

ServerSafe Remote Backup is a powerful, next-generation online backup solution for backing up data over the internet. ServerSafe allows users to benefit from centralized and automated backup of application and database servers across their network. ServerSafe technology excels at standalone server backup as well as multi-site, multi-platform server backup. ServerSafe Remote Server Backup offers:

**Automated, unattended backup** to ensure that data held on Windows servers, Mac OS X, Linux/Unix/Solaris servers, AS400, Netware or in SQL and Oracle databases is securely backed up

**Agentless technology** means that with ServerSafe, there are no additional software agents to buy, install and manage for every machine used - a key benefit

**Live SQL Server and live Exchange backup.** ServerSafe can back up live SQL Server and live Exchange at the brick level

**Advanced compression technologies** - including common file elimination and delta blocking - maximize data transfer rates at the local and enterprise level for fast backups and recoveries

**End-to-end security.** All data is AES encrypted at your site before it is transmitted, and then it is stored in encrypted format at our secure data centers

**Regulatory compliance** - ServerSafe remote server backup solution helps you comply with the latest rules including those mandated by Sarbanes-Oxley, HIPPA, SEC Rule 17a, the Patriot Act, and others

**Seamless multi-site backup.** With centralized control of the remote office and branch office backup process, ServerSafe takes multi-site backup to a new level (no remote staff involvement needed)

### About NetMass, Inc.

NetMass' Internet office solutions help businesses of all sizes realize secure data protection, business continuity, and improved PC productivity. With its SystemSafe suite of office products, NetMass delivers online backup, data storage, file sharing, remote access, and disaster recovery solutions.
